

Block alignment

A fixed-size node left-aligns in the flow by default. `addSvgIcon(icon, w, align)` / `addAligned(align, node)` seats it left, centre, or right across the content width — no manual maths.

`addSvgIcon(icon, 44, HorizontalAlign.LEFT)`

`addSvgIcon(icon, 44, HorizontalAlign.CENTER)`

`addSvgIcon(icon, 44, HorizontalAlign.RIGHT)`

`addAligned(CENTER, anyNode)` — works for any fixed node, e.g. a path
