

GraphCompose

v1.8.0

illustrative

Open-source Java library for generating structured business PDF documents with a declarative DSL.

1 Java · Declarative DSL

```
var out = Path.of("deck.pdf");
try (var doc = GraphCompose
    .document(out)
    .pageSize(DocumentPageSize.A4)
    .create()) {
    doc.pageFlow(page -> page
        .addParagraph("GraphCompose")
        .addParagraph("Cinematic."));
    doc.buildPdf();
}
```

You describe the document intent — the engine resolves the rest.

2 GraphCompose Engine

Semantic graph · deterministic layout

3 Output Backends

4 Real PDF Output

CVs, invoices, reports — every one rendered by the engine in this repo.
