Block alignment

A fixed-size node left-aligns in the flow by default. addSvgIcon(icon, w, align) / addAligned(align, node) seats it left, centre, or right across the content width — no manual maths.

addSvgIcon(icon, 44, HorizontalAlign.LEFT)

addSvgIcon(icon, 44, HorizontalAlign.CENTER)

addSvgIcon(icon, 44, HorizontalAlign.RIGHT)

addAligned(CENTER, anyNode) — works for any fixed node, e.g. a path
