Dear Hiring Team at **Northwind Systems**,

I am excited to share my interest in the Senior Platform Engineer role. My recent work has focused on building **reusable document-generation systems** that balance public API design, render quality, and maintainability.

I enjoy translating fuzzy workflow requirements into clear template abstractions, reliable test coverage, and examples that make adoption easier for the rest of the team.

I would welcome the opportunity to bring that same mix of engineering rigor and product thinking to your platform group.

Sincerely,

Jordan Rivera
