# JORDAN RIVERA

+44 20 5555 1000 | jordan.rivera@example.com | London, UK | LinkedIn | GitHub

## PROFESSIONAL SUMMARY

Platform engineer with **10+ years** building resilient document-generation pipelines, layout engines, and developer-facing template systems. Specialised in high-throughput PDF rendering, semantic authoring DSLs, and turning brittle production-ops scripts into typed, snapshot-tested libraries that scale.

## PROFESSIONAL EXPERIENCE

**SENIOR PLATFORM ENGINEER** **2024-Present**

Northwind Systems

Led the reusable document-generation platform serving billing, hiring, and reporting flows across **8 product teams**. Reduced template maintenance time by **70%** by retiring per-team PDF scripts in favour of one canonical engine.

**SOFTWARE ENGINEER** **2021-2024**

BrightLeaf Labs

Built backend services and production document rendering pipelines processing **2M+ documents per month**. Drove the migration from iText to a custom layout engine, eliminating licensing risk and cutting p99 render latency from 1.4s to 380ms.

**BACKEND ENGINEER** **2019-2021**

Helix Print Co

Maintained a high-volume invoice-printing service (15M PDFs/year) and authored the compliance test harness that gated every template change.

## EDUCATION

**MSC COMPUTER SCIENCE** **2019-2021**

University of Manchester

Distinction. Thesis: *Composable layout primitives for deterministic document rendering*.

**BSC SOFTWARE ENGINEERING** **2015-2019**

Imperial College London

First-class honours. Specialisation in compilers and static analysis.

**ORACLE JAVA CERTIFICATION** **2023-2024**

Professional track

Java 17 platform deep-dive: records, sealed types, pattern matching, virtual threads.

## TECHNICAL SKILLS

- **Languages:** Java 21, Kotlin, Groovy, Python, SQL
- **Document & Print:** PDFBox, Apache POI (DOCX/XLSX), iText, PostScript, ICC colour profiles, font metrics
- **Layout engines:** Custom DSL design, semantic layout trees, pagination, snapshot testing, visual regression
- **Build & infrastructure:** Maven, Gradle, GitHub Actions, JitPack, Docker, JMH benchmarking
- **Testing:** JUnit 5, AssertJ, PDFBox-based PNG diff, layout-graph snapshots, mutation testing (Pitest)
- **Distribution:** Maven Central, Sonatype OSSRH, GPG signing, JitPack, semantic versioning discipline

## ADDITIONAL INFORMATION

**Languages:** English (Fluent), German (Intermediate), Spanish (Basic)

**Work Eligibility:** Eligible to work in the UK and the EU

**Open Source:** Maintainer of GraphCompose. Regular contributor to PDFBox issue triage.

**Speaking:** JVM Summit 2024, Devoxx UK 2025 — both on declarative document layout.

## PROJECTS

**GraphCompose (Java 21, PDFBox, Maven, JMH)** - Declarative Java PDF layout engine. Semantic DSL, slot-based templates, snapshot testing. Powers production CV / invoice / proposal pipelines for hiring tools and billing systems. *(Open source)*

**Template Studio (Kotlin, Compose Desktop, PDFBox PNG diff)** - Internal tool for evaluating CV, proposal, and invoice output across 14 design presets. PNG diffing, side-by-side layout, baseline freezing.

**LayoutLint (Java 21, JavaParser, Spoon)** - Static analyser that flags fragile authoring patterns (deeply nested rows, untyped offsets, implicit page breaks) before they ship to production.

**ChromeForge (Java, GraphCompose, Pandoc bridge)** - Editorial-magazine document toolkit built on GraphCompose: cinematic covers, pull quotes, multi-column flow, sidebar callouts.
