JORDAN RIVERA

Platform Engineer
+44 20 5555 1000 - London, UK
jordan.rivera@example.com | LinkedIn | GitHub

PROFESSIONAL PROFILE

Platform engineer with **10+ years** building resilient document-generation pipelines, layout engines, and developer-facing template systems. Specialised in high-throughput PDF rendering, semantic authoring DSLs, and turning brittle production-ops scripts into typed, snapshot-tested libraries that scale.

SKILLS

• Java 21	• Kotlin	• Groovy	• Python
• SQL	• PDFBox	• Apache POI (DOCX/XLSX)	• iText
• PostScript	• ICC colour profiles	• font metrics	• Custom DSL design
• semantic layout trees	• pagination	• snapshot testing	• visual regression
• Maven	• Gradle	• GitHub Actions	• JitPack
• Docker	• JMH benchmarking	• JUnit 5	• AssertJ
• PDFBox-based PNG diff	• layout-graph snapshots	• mutation testing (Pitest)	• Maven Central
• Sonatype OSSRH	• GPG signing	• JitPack	• semantic versioning discipline

EDUCATION

MSc Computer Science 2019-2021
University of Manchester
Distinction. Thesis: *Composable layout primitives for deterministic document rendering*.

BSc Software Engineering 2015-2019
Imperial College London
First-class honours. Specialisation in compilers and static analysis.

Oracle Java Certification 2023-2024
Professional track
Java 17 platform deep-dive: records, sealed types, pattern matching, virtual threads.

PROJECTS

GraphCompose *(Java 21, PDFBox, Maven, JMH)*
Declarative Java PDF layout engine. Semantic DSL, slot-based templates, snapshot testing. Powers production CV / invoice / proposal pipelines for hiring tools and billing systems. *(Open source)*

Template Studio *(Kotlin, Compose Desktop, PDFBox PNG diff)*
Internal tool for evaluating CV, proposal, and invoice output across 14 design presets. PNG diffing, side-by-side layout, baseline freezing.

LayoutLint *(Java 21, JavaParser, Spoon)*
Static analyser that flags fragile authoring patterns (deeply nested rows, untyped offsets, implicit page breaks) before they ship to production.

ChromeForge *(Java, GraphCompose, Pandoc bridge)*
Editorial-magazine document toolkit built on GraphCompose: cinematic covers, pull quotes, multi-column flow, sidebar callouts.

EXPERIENCE

Senior Platform Engineer 2024-Present
Northwind Systems
Led the reusable document-generation platform serving billing, hiring, and reporting flows across **8 product teams**. Reduced template maintenance time by **70%** by retiring per-team PDF scripts in favour of one canonical engine.

Software Engineer 2021-2024
BrightLeaf Labs
Built backend services and production document rendering pipelines processing **2M+ documents per month**. Drove the migration from iText to a custom layout engine, eliminating licensing risk and cutting p99 render latency from 1.4s to 380ms.

Backend Engineer 2019-2021

Helix Print Co
Maintained a high-volume invoice-printing service (15M PDFs/year) and authored the compliance test harness that gated every template change.

ADDITIONAL

Languages: English (Fluent), German (Intermediate), Spanish (Basic)
Work Eligibility: Eligible to work in the UK and the EU
Open Source: Maintainer of GraphCompose. Regular contributor to PDFBox issue triage.
Speaking: JVM Summit 2024, Devoxx UK 2025 — both on declarative document layout.
