Inline shapes

Geometric figures drawn on the text baseline **from geometry, not font glyphs** — between text and as list bullets, at any size and colour.

dot(size, fill) — filled and outlined rating dots

Java ●●●●○ Kotlin ●●●○○

arrow(size, Direction, fill) — direction between text

Draft → Review → Published

chevron(size, Direction, fill) — light directional separator

Home › Docs › API › InlineShapeRun

checkbox(size, checked, color) — todo markers, checked and unchecked

- [x] A checked box stamps a filled tick inside the frame
- [x] Both states share the same geometry pipeline
- [ ] An empty box is the unchecked state
- [ ] No font glyph, so it renders anywhere

any ShapeOutline as a list bullet

◆ Diamond ★ Star ▲ Triangle ➜ Arrow ⬢ Hexagon

checkmark(w, h, CheckmarkStyle) · arrow(w, h, Direction, ArrowStyle) — swap the design

Tick ✓ classic ✓ heavy Arrow → block ▶ triangle

- [x] A checkbox takes any tick variant — here HEAVY
