Professional Summary

Backend engineer focused on clean Java APIs, stable document output, and reusable template architecture.

Technical Skills

- Java 21 and Spring Boot
- PDF document generation with GraphCompose
- Layout snapshot testing and render regression checks
- Modular template design for CV, invoice, and proposal flows

Projects

GraphCompose - canonical engine migration, module-first DSL, and business template cleanup.

CVRewriter - profile-aware CV tailoring platform with secure Spring Boot backend and PDF generation.
