Platform engineer with seven years spent making other teams' deployments boring: build pipelines, the service templates behind them, and the observability that says whether a release went well. Writes the runbook before the incident.

EXPERIENCE

Senior Platform Engineer

Feb 2022 - Present

Nordvik Systems | Oslo, NO

- Rebuilt the deployment pipeline around a golden path, cutting median lead time from two days to forty minutes.
- Owns the Kubernetes platform four product teams ship onto, and the on-call rota that follows it.
- Introduced service-level objectives the teams actually read, and retired the dashboards nobody did.

Platform Engineer

Aug 2019 - Jan 2022

Bergen Data | Bergen, NO

- Moved forty services off hand-rolled scripts onto a shared Terraform module set.
- Built the log and metric pipeline the incident process still runs on.
- Ran the migration to a single identity provider across every internal tool.

Backend Engineer

Sep 2017 - Jul 2019

Fjordline Software | Oslo, NO

- Delivered booking and payment services for a ferry operator's public API.
- Replaced a nightly reconciliation batch with a streaming job.

PROJECTS

Ledgerkit

Java, PostgreSQL, Testcontainers

Open-source double-entry ledger for JVM services, with a property-based suite over the posting rules.

Runbook Digest

Kotlin, Kafka, OpenSearch

Reads alert history and drafts the retrospective agenda before the meeting starts.

EDUCATION

M.Sc. in Computer Science

University of Oslo

2015 - 2017 | Oslo, NO

B.Sc. in Informatics

NTNU

2012 - 2015 | Trondheim, NO

SKILLS

LANGUAGES

- Java
- Kotlin
- Go
- SQL

PLATFORM

- Kubernetes
- Terraform
- GitHub Actions
- Argo CD

DATA

- PostgreSQL
- Kafka
- OpenSearch

PRACTICES

- Observability
- Incident Response
- Threat Modelling

SOFT SKILLS

Mentoring | Facilitation
Writing | Pragmatism
Patience | Curiosity

CERTIFICATIONS

- Certified Kubernetes Administrator (CNCF)
- Terraform Associate (HashiCorp)
- AWS Solutions Architect Associate (AWS)
- Professional Cloud Architect (Google)
- Site Reliability Foundations (Linux Foundation)

ACHIEVEMENTS

Lead Time Cut by 96%

Took median deployment lead time from two days to forty minutes across four teams.

Zero-Downtime Migration

Moved the booking platform onto Kubernetes over six weeks without a customer-visible outage.

Engineer of the Year 2024

Recognised for the platform work and for the mentoring that came with it.
