

# JORDAN RIVERA

Platform Engineer  
+44 20 5555 1000 - London, UK  
jordan.rivera@example.com | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL PROFILE

Platform engineer with **10+ years** building resilient document-generation pipelines, layout engines, and developer-facing template systems. Specialised in high-throughput PDF rendering, semantic authoring DSLs, and turning brittle production-ops scripts into typed, snapshot-tested libraries that scale.

## KEY SKILLS

|                         |                          |                             |                                  |
|-------------------------|--------------------------|-----------------------------|----------------------------------|
| • Java 21               | • Kotlin                 | • Groovy                    | • Python                         |
| • SQL                   | • PDFBox                 | • Apache POI (DOCX/XLSX)    | • iText                          |
| • PostScript            | • ICC colour profiles    | • font metrics              | • Custom DSL design              |
| • semantic layout trees | • pagination             | • snapshot testing          | • visual regression              |
| • Maven                 | • Gradle                 | • GitHub Actions            | • JitPack                        |
| • Docker                | • JMH benchmarking       | • JUnit 5                   | • AssertJ                        |
| • PDFBox-based PNG diff | • layout-graph snapshots | • mutation testing (Pitest) | • Maven Central                  |
| • Sonatype OSSRH        | • GPG signing            | • JitPack                   | • semantic versioning discipline |

## EDUCATION

### MSc Computer Science 2019-2021

University of Manchester

Distinction. Thesis: *Composable layout primitives for deterministic document rendering*.

### BSc Software Engineering 2015-2019

Imperial College London

First-class honours. Specialisation in compilers and static analysis.

### Oracle Java Certification 2023-2024

Professional track

Java 17 platform deep-dive: records, sealed types, pattern matching, virtual threads.

## PROJECTS

### GraphCompose ([Java 21](#), [PDFBox](#), [Maven](#), [JMH](#))

Declarative Java PDF layout engine. Semantic DSL, slot-based templates, snapshot testing. Powers production CV / invoice / proposal pipelines for hiring tools and billing systems. ([Open source](#))

### Template Studio ([Kotlin](#), [Compose Desktop](#), [PDFBox PNG diff](#))

Internal tool for evaluating CV, proposal, and invoice output across 14 design presets. PNG diffing, side-by-side layout, baseline freezing.

### LayoutLint ([Java 21](#), [JavaParser](#), [Spoon](#))

Static analyser that flags fragile authoring patterns (deeply nested rows, untyped offsets, implicit page breaks) before they ship to production.

### ChromeForge ([Java](#), [GraphCompose](#), [Pandoc bridge](#))

Editorial-magazine document toolkit built on GraphCompose: cinematic covers, pull quotes, multi-column flow, sidebar callouts.

## EMPLOYMENT HISTORY

### Senior Platform Engineer 2024-Present

Northwind Systems

Led the reusable document-generation platform serving billing, hiring, and reporting flows across **8 product teams**. Reduced template maintenance time by **70%** by retiring per-team PDF scripts in favour of one canonical engine.

### Software Engineer 2021-2024

BrightLeaf Labs

Built backend services and production document rendering pipelines processing **2M+ documents per month**. Drove the migration from iText to a custom layout engine, eliminating licensing risk and cutting p99 render latency from 1.4s to 380ms.

### Backend Engineer 2019-2021

Helix Print Co  
Maintained a high-volume invoice-printing service (15M PDFs/year) and authored the compliance test harness that gated every template change.

---

ADDITIONAL

---

**Languages:** English (Fluent), German (Intermediate), Spanish (Basic)  
**Work Eligibility:** Eligible to work in the UK and the EU  
**Open Source:** Maintainer of GraphCompose. Regular contributor to PDFBox issue triage.  
**Speaking:** JVM Summit 2024, Devovx UK 2025 — both on declarative document layout.
